English

Mobile application

I am a junior mobile application developer with one year of experience in developing cross-platform apps using Flutter. I have a passion for creating engaging and user-friendly applications that solve real-world problems. I have worked on several projects, such as a shopping app, a fitness tracker, and a social media app, using Flutter, Dart, Firebase, and other popular libraries, such as bloc, dio, and getx. I have a good understanding of state management, network communication, and dependency injection. I am eager to learn new skills and collaborate with other developers to deliver high-quality products.

Education

Bachelor's student in computer engineering
(active member of the university's computer engineering scientific association)

2022 - Present
